Table 1. Publications, Patents and Software Copyrights

No.	Title	Journal / Patent / Copyright	Year	Author Rank	Status	Indexing
1	Path Planning for Unmanned Ship Based on the Prioritized Experience Replay of Deep Q-Networks (基于优先经验回放深度Q网络的无人航行器智能路径规划方法)	Basic & Clinical Pharmacology & Toxicology	2020	1	Published	SCI (Q2)
2	The Decoupled Vector-Control of PMSM Based on Nonlinear Multi-Input Multi-Output Decoupling ADRC (基于非线性多输入多输出解耦自抗扰控制的永磁同步电机智能矢量控制方法)	Advances in Mechanical Engineering	2020	2	Published	SCI (Q2)
3	Dynamic Navigation and Area Assignment of Multiple USVs Based on Multi-Agent Deep Reinforcement Learning (基于多智能体深度强化学习的多无人水面航行器动态导航与区域协同分配方法)	Sensors	2022	1	Published	SCI (Q2)
4	Energy-Efficient Reinforcement Learning for Motion Planning of AUV (面向无人潜航器运动规划的节能强化学习方法)	2022 IEEE 9th International Conference on Underwater System	2022	1	Published	EI
5	Improved Dueling Deep-Q-Networks Based Path Planning for Intelligent Agents (基于改进对抗深度Q网络的智能体强化学习路径规划方法)	International Journal of Vehicle Design	2023	2 (Corresponding author)	Published	SCI (Q3*)
6	The Adaptive Energy-Efficient Reinforcement Learning for AUV 3D Motion Planning in Complex Underwater Environments (面向复杂水下环境无人潜航器三维运动规划的自适应节能强化学习方法)	Ocean Engineering	2024	1	Accepted	SCI (Q1)
7	A Three-Dimensional Space Reinforcement-Learning Path Planning Control Method	Patent	2024	2	Published	-
8	A Multi-Objective Game-Theoretic Method for Unmanned System Clusters	Patent	2024	2	Published	-
9	A Reinforcement Learning Reasoning Method for Multi-Objective Tracking Strategies for Unmanned Boat Clusters	Patent	2024	2	Published	-
10	Bandwidth-aware Multimodal Sensor Data Prioritization for Multi-unmanned Surface Vehicle Tracking Using Dynamic Marine Attention Network (基于动态海洋注意力网络的多无人水面航行器跟踪多模态传感器数据优先级分配方法)	Sensors and Materials	2026	2 (Corresponding author)	Published	SCI (Q3*)
11	SATNet-Based Game-Theoretic MADRL with Dual-Layer Attention for Hierarchical Multi-Target Tracking in USVs (基于SATNet博弈论MADRL与双层注意力的无人水面艇分层多目标跟踪方法)	SCI Q1 Journal	2026	1	Under Review	SCI (Q1)
12	Software Copyright: AI智慧港口数字孪生与绿色低碳决策优化平台 V1.0	Software Copyright	2026	1	Applied	-

* Chinese translations are explanatory versions for HR readability, with wording oriented toward AI / reinforcement learning / unmanned vehicle research.
* Q1/Q2/Q3 indexing follows the provided table and notes. The SATNet manuscript title/year/author order were extracted from submission.pdf; the target journal name was not shown in the PDF, so the journal field uses the provided SCI Q1 under-review description.
